

Electric Gate Service & Maintenance

Automatic gate maintenance is essential in order to ensure the safety features are functioning correctly and to prevent in-service failures that could cause major disruption to day-to-day operations at the site where the electric gate is installed.

Depending on the usage pattern, mode(s) of operation and business critically, electric powered gates should be serviced, maintained and repaired at least once every six months.

Atlanta Entry Systems offers three levels of standardized automatic gate maintenance plans.

Gold

4 yearly site visits recommended for up to 45 cycles per day Every 3 Months
Total \$698.00

Sliver

3 yearly site visits recommended for up to 30 cycles per day Every 4 Months
Total \$523.50

Bronze 2 yearly site visits recommended for up to 15 cycles per day Every 6 Months
Total \$349.00

* All travel and labor cost for Maintenance is included. Any damages incurred outside of maintenance schedule is not applicable. (vehicle damage for example). Any parts required will be charged separately and not inclusive of maintenance plan. 10% discount is applicable.

How often you should service your gate will depend on how many cycles the gates perform. This is the number of times the electric gate opens and closes. Generally speaking, low usage residential electric driveway gates should be serviced at least 1-2 times per year; medium usage automated car park gates for an apartment block should be serviced at least 3 times per year; and heavy usage commercial automatic gates require the most frequent amounts of servicing of at least 4 times per year.

In addition to offering electric gate repairs to our supplied products, Atlanta Entry Systems will be as equally happy to maintain gates designed, manufactured and

installed by other gate contractor suppliers – subject to an initial gate inspection checklist.

Our preventative maintenance service includes inspection and lubrication of mechanical components, and inspection and testing of safety-related devices in line with current guidance from the HSE and the Powered Gate Group of the Door and Hardware Federation. In accordance with the DHF Best Practice Guide, all of our engineers are DHF (Door & Hardware Federation) approved and are 17th edition qualified electricians.

If you would like to discuss the repair, upgrade or maintenance of your existing Automatic Gate, please call Atlanta Entry Systems @ 404-820-5400 and our security gates and fencing team will be happy to help.

Why have Automatic Gate Maintenance?

Regular maintenance not only ensures that your gates are safe and compliant with the latest legislation, but also reduces the chances of any potential issues that could have an impact on the day-to-day running of your business.

Our maintenance agreements are designed to keep disruptive downtime to a minimum as well as minimizing safety risks and costs.

To comply with the US Health and Safety Executive (HSE) Standards, gate manufacturers recommendations and to ensure that your motorized gate remains in good working condition, it is therefore vital that your automatic gates are regularly maintained.

Benefits of Electric Gate Maintenance

Budgeted maintenance costs

Identification of problems and repair before failure occurs

Less costly downtime with an efficient system.

Documented maintenance

Health & Safety compliant – meets current legislative standards

Safety parts are regularly checked, reducing your risk of accidents thus ensuring health and safety regulation requirements for workplaces are fulfilled and maintained

The prolonged operating life of your system

Service by trained technicians

Fully stocked vehicles with access to repair products.

365 days a year, 24 hours, 7 days a week Atlanta coverage
Fast, reliable and professional service
Reminders of when your gate service maintenance is due
CHAS Accredited

What checks are carried out by our Gate Maintenance Engineers?

Depending on the type of gate, this could include the following:

Check overall system

Force testing

Check alignment of hinges

Check gate for any structural issues on frame

Inspect the gate whilst opening/closing

Full safety inspection checking photocells are aligned, safety edges are fully operating and the gate stops and returns on impact

Inspect for any oil leaks

Lubricate all mechanical parts

Lubricate hinges and pins

Check gate automation settings: speed, slow down upon opening and/or closing

Check manual release in case of power failure

Inspect earth cables and any other visible cable within and around the motor

Check access keys and key fobs

Check intercom systems

Inspect general overall condition of the gate

What gates do you maintain and repair?

Swing gates

Sliding gates

Tracked gates

Bi-folding gates

Telescopic gates

Cantilever gates

Electric driveway gates

All types of automatic gates

All of our automated gate systems are designed and installed to the highest industry standards, and so too is our commitment to service maintenance and after sale care.

Our customers include (not limited to)

Block management companies

Factories
Schools and Universities
Hospitals & Trusts
Airports
Car parks
Stadium and event venues
Residential customers

“By signing up for Atlanta Entry Systems Gate Maintenance service, you can plan and organize your complete maintenance program for the upcoming year – all in one simple step. In addition to efficiently organizing your automatic gate maintenance, it also reduces your total cost of ownership and allows you to become HSE compliant. All maintenance plans must be paid in advance.
